General Syllabus for Degree of Licentiate in Japanese

The syllabus was confirmed by the Faculty Board of Arts at Gothenburg University on 9 June 2016. It is complemented with the following documents, available via the website of the Faculty of Arts (www.hum.gu.se).

Instructions for Third-cycle Studies at the Faculty of Arts.

A third-cycle student admitted for third-cycle studies for taking the Degree of Doctor in Japanese is entitled to request to take the Degree of Licentiate in Japanese provided the requirements for courses and essays specified in this syllabus are fulfilled.

Title of qualification and description of subject

This general syllabus is for the Degree of Licentiate of Philosophy in Japanese. The research conducted in the subject area covers linguistics, comparative literature and cultural studies.

1. Objectives

1.1 General national objectives

According to the Qualifications Ordinance, Appendix 2 of the Higher Education Ordinance, the objectives for the Degree of Licentiate are as follows:

Knowledge and understanding
For the Degree of Licentiate, the third-cycle student shall:

– demonstrate knowledge and understanding in the field of research including current specialist knowledge in a limited area of this field as well as specialised knowledge of research methodology in general and the methods of the specific field of research in particular.

Competence and skills
For the Degree of Licentiate, the third-cycle student shall:

– demonstrate the ability to identify and formulate issues with scholarly precision critically,
autonomously and creatively, and to plan and use appropriate methods to undertake a limited piece of research and other qualified tasks within pre-determined time frames in order to contribute to the formation of knowledge as well as to evaluate this work,

– demonstrate the ability in both national and international contexts to present and discuss research and research findings in speech and writing and in dialogue with the academic community and society at large, and

– demonstrate the ability required to independently participate in research and development work and to independently work in other qualified activities.

**Judgment and approach**

For the Degree of Licentiate, the third-cycle student shall:

– demonstrate the ability to make assessments of ethical aspects of their own research,

– demonstrate insight into the possibilities and limitations of research, its role in society and the responsibility of the individual for how it is used, and

– demonstrate the ability to identify the personal need for further knowledge and take responsibility for their own ongoing learning.

### 2. Entry requirements

Admission to the programme requires that the applicant fulfil the general and specific entry requirements provided in Chapter 7 of the Swedish Higher Education Ordinance.

**2.1 General entry requirements**

A person meets the general entry requirements under Chapter 7, Section 39 of the Higher Education Ordinance if he or she:

1. has been awarded a second-cycle qualification, or

2. has satisfied the requirements for courses comprising at least 240 higher education credits of which at least 60 higher education credits were awarded in the second-cycle, or

3. has acquired substantially equivalent knowledge in some other way in Sweden or abroad.

**2.2 Specific entry requirements**

Admission to the third-cycle programme in Japanese requires

1. at least 180 higher education credits in Japanese, of which at least 30 (including a degree project of 15 higher education credits) must be from the second cycle, or equivalent knowledge,

2. the types of Swedish and English skills needed to benefit from compulsory course activities and to be able to actively participate in seminars and similar activities.

### 3. Admission and selection

Admission to third-cycle studies in Japanese is normally initiated by the Department announcing a call for doctoral studentships. Admission is conditional upon the studies being properly funded.
In selecting between applicants, their ability to benefit from the study programme shall be taken into account in accordance with Chapter 7 of the Higher Education Ordinance. To facilitate the selection process, the applicant must submit:

1. Theses, degree projects and any publications. These are assessed based on the following criteria:
   a) whether the works meet formal scholarly and scientific standards,
   b) evidence of scientificity in the processing of material,
   c) evidence of an awareness of their own position in the broader field,
   d) evidence of critical and analytical ability,
   e) independence and originality.

2. A draft of the licentiate project. This is assessed based on the following criteria:
   a) evidence of familiarity with previous and current research in the area,
   b) independence and originality
   c) whether the formulated problems are linked to current research,
   d) evidence of ability to creatively and autonomously formulate scientific problems/research questions,
   e) whether the described methods for collection and analysis of data are adequate, and whether the draft is deemed realistic with respect to feasibility within the framework of the programme.

4. Programme disposition and content
The third-cycle programme in Japanese leading to a Degree of Licentiate comprises 120 higher education credits.

The programme consists partly of courses, which are examined incrementally, and partly of own research work, which is to lead to the presentation of a scholarly thesis.

The student shall participate in seminar activities within the confines of her or his education. He/she shall also participate in Department-wide activities, unless there are special reasons.

4.1 Courses
The programme consists of a course part comprising 60 higher education credits, of which 30 must be from a set of compulsory courses. Both compulsory and elective courses shall be determined in consultation with the third-cycle student’s supervisors.

*Compulsory courses 30 higher education credits*

Course 1: Theory of Science for the Humanities, 7,5 higher education credits
Course 2: Teaching and Learning in Higher Education, Basic Course 1, 5 higher education credits
Course 3: Japanese linguistics, alt. comparative literature, alt. cultural studies, 17,5 higher
education credits. This module is separated into 5 or 7.5 higher education credits sub-courses. The selection of courses depends on the topic and focus area of the student’s thesis project.

Elective courses 30 higher education credits

Elective courses shall be determined in consultation with the third-cycle student’s examiner and supervisors. The courses can be selected from the faculty- and department-wide courses, or courses at other higher education institutions.

The basic course in teaching and learning in higher education (5 higher education credits) should be completed during the first year of the programme.

If a third-cycle student requests credit transfer from previous education, this shall be specified in the individual study plan (see 6.1).

4.2 Licentiate thesis
The licentiate thesis comprises 60 higher education credits.

The third-cycle student is expected to provide regular reports on her or his thesis work. This obligation is primarily fulfilled through presentation at Department seminars.

Licentiate theses are defended at a public seminar. Both the content and defence are considered in the assessment of the thesis. The thesis is graded with one of the grades Pass or Fail.

For more information, see *Instructions for Third-cycle Studies at the Faculty of Arts*.

5. Supervision
At least two supervisors shall be appointed for each third-cycle student: one principal supervisor and one assistant supervisor. At least one of the supervisors must be employed at the University of Gothenburg, normally at the third-cycle student’s home Department. At least one of the supervisors must be qualified for appointment to a readership (Docent) and at least one of the supervisors must have completed supervisor training.

The third-cycle student is entitled to supervision at least as stipulated by the standard adopted by the Faculty Board (see *Instructions for Third-cycle Studies at the Faculty of Arts*).

A third-cycle student who so requests is entitled to change supervisors.

6. Individual study plan
In connection with admission, an electronic individual study plan shall be drawn up by the third-cycle student and his/her supervisors in consultation with the doctoral examiner. The document must be finalised no later than two months after commencement of studies.

The individual study plan shall be reviewed at least once a year. The review shall clearly identify the third-cycle student’s progression.

6.1 Credit transfer
When the individual study plan has been established, the third-cycle student may request that credits be transferred from past successfully completed second- or third-cycle education. Credits applied to fulfil the general or specific entry requirements may not also be applied towards the third-cycle degree, but must be replaced with another course. In addition, the
following applies:

(i) A third-cycle student who has successfully completed a second-cycle course that is included as a compulsory or elective course at third-cycle level may request that the course be replaced with another course of the same extent in the individual study plan. This does not affect the duration of the programme for the Degree of Licentiate.

(ii) A third-cycle student who has completed part of his/her third-cycle education while he/she was enrolled as a third-cycle student at another higher education institution or in another subject may request that the part be applied directly to her or his degree without replacements. This reduces the duration of the study programme for a Degree of Licentiate in proportion to the credits transferred.

6.2 Timetable and funding plan
The individual study plan shall include a timetable and associated funding plan for the entire period of study, up to the date planned for the public defence of the thesis.

7. Transitional provisions
Third-cycle students admitted before 1 June 2016 may, following consultation with supervisors and the doctoral examiner, request permission from the Head of Department to transfer this programme syllabus. The individual plan must then be updated.
